<sup>\*</sup> In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

<sup>†</sup> Figures not available.

Explanation of symbols used :—B.=Births; B.R.=Birth Rate; C.=Cholera; S.=Smallpox; P.=Plague; F.=Fevers; D.D.=Dysentery and Diarrhoea; R.D.=Respiratory Diseases; M.D.=Maternal Deaths; D.R.=Death Rate; I.D.=Infantile Deaths (included in total deaths).

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 11th October, 1952—contd.

<sup>•</sup> In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

<sup>†</sup> Figures not available.

Explanation of symbols used :—B.—Births; B.R.—Rirth Rate; C.—Cholera; S.—Smallpox; P.—Plague; F.—Fevers; D.D.—Dy. sentery and Diarrhoea; R.D.—Respirtoary Diseases; M.D.—Maternal Deaths; D.R.—Death Rate; I.D.—Infantile Deaths (included in total deaths).

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 11th October, 1952—contd.

<sup>\*</sup>In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

<sup>†</sup>Figures not available

Explanation of symbols used:—B.—Births; B. R.—Birth Rate; C.—Cholera; S.—Smallpox: P.—Plague; F.—Fevers; D.D.—Dysmtery and Diarrhoen; R.D.—Respiratory Diseases; M.D.—Maternal Donths; D.R.—Death Rate; I.D.—Infantile Deaths (included in total deaths).

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the we'k ending

#### REMARKS

The figures of births and deaths shown in this statement for week ending the 11th October, 1952, relate to 186 towns with an estimated population of 24,418 thousands. The total number of towns is 281 and their population is 34,764 thousands. Thus 66% of the total number of towns representing 70% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 19,674 and 8,475 representing birth and death rates of 41.9 and 18.0 per thousand of population respectively.

(A) States (Parts A & C).—The data here relate to 161 towns with an estimated population of 21,500 thousands. Information about Bihar and West Bengal could not be included. The total number of towns is 235 and their population is 29,570 thousands. Thus 69% of the total number of towns representing 73% of the total population is covered. The numbers of

births and deaths recorded in these towns were 17,726 and 7,727 representing birth and death rates of  $42\cdot 9$  and  $18\cdot 7$  per thousand of population respectively. The table at the end gives the position by States.

Hardwar in Uttar Pradesh was the only town which recorded a high death rate of 53.2 per one thousand population and this high death rate was mainly due to deaths from fevers.

(B) States (Part B).—The data here relate to 25 towns with an estimated population of 2,918 thousands. The total number of towns is 46 and their population is 5,194 thousands. Thus 54% of the total number of towns representing 56% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,948 and 750 representing birth and death rates of 34.7 and 13.3 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
